WORK EXPERIENCE

IOKA, Kazakhstan – Frontend Developer

March 2021 – June 2021

- Designed and implemented an interactive and customized payment form.
- Built a corporate page and front side for several internal and external services for payment processing.

TELE2, Kazakhstan – Frontend Developer

March 2020 – March 2021

- An admin panel for an archivists and other employees to manage and search within the digital archive.
- Automated the internal process of submitting and controlling employees' travel reports, by creating a corporate application, which optimized the overall duration by 5 times.

Beeline, Kyrgyzstan – Frontend Developer

October 2018 – March 2020

- An internal scoring system for employees which uses feedback from the customers they interact with for further analytics.
- A corporate CRM, which replaced an external paid CRM service and made the call-center service more personalized.
- An interactive site for ordering phone numbers online, which uses gamification tricks while searching for available numbers.
- A web application for beauty masters using React, Redux for state management, Jest/Enzyme for testing components. Also, our team followed Scrum framework for managing processes.

MadDevs, Kyrgyzstan – intern

June 2018 – August 2019

- I built web pages based on a specified design to the project which promotes tourism in Kyrgyzstan
